

## Retrofit Compatibility Chart

You can use the table below to determine whether you can flush-mount the Garmin Signal™ VHF radio into an existing dash cutout.

In some cases, such as replacing a Garmin® VHF 110/115 radio, you must download and print the retrofit kit template and use it as a guide to enlarge the existing cutout before you can install the Garmin Signal VHF radio using the retrofit kit (sold separately).

| Cutout Dimensions                                  | Compatibility                                                                                                                                                                                                                                                          |
|----------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Smaller than 138 mm x 62 mm</b>                 | Compatible. You can use the included mounting template to enlarge the cutout.                                                                                                                                                                                          |
| <b>From 138 mm x 62 mm to 157.20mm x 66.50 mm</b>  | Compatible. You must use the Garmin Signal VHF radio retrofit kit (sold separately), and use the retrofit template to enlarge the cutout. Go to <a href="https://garmin.com/manuals/SignalVHF">garmin.com/manuals/SignalVHF</a> to download the retrofit kit template. |
| <b>From 157.20 mm x 66.50 mm to 178 mm x 82 mm</b> | Compatible. You must use the Garmin Signal VHF radio retrofit kit (sold separately). You do not need to modify the existing cutout.                                                                                                                                    |
| <b>Larger than 178 mm x 82 mm</b>                  | Not compatible. You cannot use the equipment provided with the Garmin Signal VHF radio or the retrofit kit to install the radio in an opening this large.                                                                                                              |

You can purchase the retrofit kit from your Garmin dealer, or you can go to [garmin.com/SignalVHF-Accessories](https://garmin.com/SignalVHF-Accessories).
