

CABLEMASTER™ - CRMA30

Handling and Storage System for Shore Power Cable

CRMA Cablemaster units, take all the work out of managing your boats 30 amp shore power cable.

This self contained "ready to fit" system is supplied with a pre-installed length of shore power cable and is fitted with a standard dockside connector.

The CRMA Cablemaster's drive system features an innovative clutch mechanism that allows the storage reel to "free wheel" making it easy and quick to use - simply pull out whatever length of shore power cable is required, and when its time to retract the cable, press and hold the control switch (supplied) to engage the powerful DC motor (12v or 24v) that will effortlessly retract the cable and re-store it on the reel.

- **EASY TO USE** - Simply pull out the amount of shore power cable you need to make your connection, then when ready push the button and the cable will be retracted and stored on the reel.
- **'ZERO EFFORT' PULL-OUT FORCE** - Our patented drive motor mechanism disengages itself when the cable is extended. No heavy pulling!
- **COMPACT STORAGE** - Self contained unit, and can be mounted wherever there is free space.
- **EASY TO INSTALL** - A variety of mounting options make it quick and easy to mount the unit in any chosen position with or without hawse pipe.
- **TESTED & APPROVED** - UL, CSA, ABYC, CE, ISO8846 (Ignition protected).

Extend...Retract...Relax!
