

Premium Blister Protection

High-Build Epoxy Primer
with Microsheet Silicate Technology

- Highest build epoxy
- Fewer coats needed
- Longer window between coats
- Fast drying, easy to use
- Reduced labor
- Less haulout time

Keeps Water Out!

How to Save Time and Money with Tuff Stuff™ Premium Blister Protection

Tuff Stuff is an extremely high-build two-part epoxy that **dries fast**, enabling application of a complete barrier system and bottom paint in just two days. Using microsheet silicate technology, millions of microscopic sheets overlap and build a **100% water barrier** that protects the surface from moisture and water penetration.

Superior Blister Prevention & Repair

Tuff Stuff is extremely effective for blister prevention on fiberglass, or as a bilge coating, because it is resistant to oil and water. As a universal primer, it can be used for corrosion protection on most metals below the waterline, and for priming any metal. Tuff Stuff creates an overlapping barrier to eliminate any direct path for water migration.

Why Tuff Stuff?

- Use over blistered fiberglass as a repair coat, and over unblistered fiberglass as a barrier coat.
- Protects metals from corrosion, including: aluminum, bronze, stainless steel, cast iron and lead – above and below the waterline.
- Excellent for priming props, shafts, keels, trim tabs, thru hulls and lower units.
- Easy application requires only two to three coats for fiberglass blister protection.
- Sag resistance prevents runs during application.
- Maximum resistance to fresh or salt water.
- Easy 1:1 mixing formula makes it efficient to use for jobs of all sizes.
- Thickeners such as Microballoons or Cabosil can be added to create a paste for problem areas.
- Available in light gray and white.

LIMITED WARRANTY:

The manufacturer warrants all material sold by it against defects in the material. The manufacturer's liability under the sale and warranty of this material shall in any case be limited to replacement of material only. The manufacturer makes no other warranty of this product, expressed or implied.
